Important changes to First Super

Changes to First Super's strategic asset allocation

Our strategic asset allocation sets the mix of assets for each investment option to help manage the balance between risk and return over the long term. From 1 October 2026, we're updating the asset mix for our Super and Pension Balanced, Conservative Balanced, Growth and Shares Plus investment options.

You can view the latest strategic asset allocations for each investment option at **firstsuper.com.au/investments**.
